2 Use of the Card Payment Facility

- 2.1 Following the signature of this Agreement by the Bank and the Customer, the setting up of the Business Account and the Payment Account, the specification by the Bank of the Scheme Limit and all other administrative arrangements deemed necessary by the Bank, the Bank will create Supplier Cards for the Services which are available to be used by the Customer in accordance with the terms of this Agreement.
- 2.2 Each Supplier Card may only be used to make transactions within the Scheme Limit.
- 2.3 Cardholders and Users may only authorise Nominated Supplier Invoices to complete Card Transactions with Nominated Suppliers who accept the Supplier Card as payment.
- 2.4 The Customer shall ensure that:
 - 2.4.1 Programme Administrator(s) are fit and proper persons and that they comply with the terms of this Agreement at all times;
 - 2.4.2 any changes to the Programme Administrator(s) will be notified to the Bank by an authorised signatory of the Customer. The Bank will then provide the Customer with a form to be completed for the appointment of a new Programme Administrator;
 - 2.4.3 only a Cardholder, Programme Administrator or User may authorise a Nominated Supplier to make a Card Transaction using a Supplier Card. For the avoidance of doubt, a Nominated Supplier is not able to authorise a Card Transaction. A Nominated Supplier can only process a Card Transaction using the Supplier Card once authorised by the Cardholder, Programme Administrator or User; and
 - 2.4.4 each Cardholder, Programme Administrator or User will follow such security and other procedures as the Bank stipulates for the use of Supplier Cards at all times.
- 2.5 No Cardholder is under any liability to make any payment and no representation or statement is made by the Customer or any of its officers, employees or agents (including the Programme Administrator(s)) which purports to impose liability on any Cardholder for the making of any such payment.

- 2.6 All Non Currency Card Transactions will be converted to the Currency and debited to the relevant Supplier Card at the Payment Scheme Exchange Rate which is applicable on the day the Card Transaction is debited to the relevant Cardholder Account (or Business Account, where relevant) which may be after the day the Card Transaction is carried out. The Non Currency Card Transaction fee as shown on the Website (which may be amended from time to time in accordance with clause 9) is added to the converted Currency amount and this fee and the converted Currency amount will be shown on the Supplier Card Statement.
- 2.7 The Customer undertakes to ensure that no Supplier Card is used in a manner prohibited by law and, in the case of a Customer which is a body corporate, the provisions of Part 10 Section 197 of the Companies Act 2006.
- 2.8 The Customer may request an increase in the Scheme Limit (via its relationship manager) from time to time. All requests will be subject to the Bank's normal credit review and approval process.
- 2.9 The Bank has the right to refuse authorisation for any particular Card Transaction if its execution would be unlawful or the Card Transaction has not been initiated or executed in the manner set out in this Agreement. If authorisation is given by the Bank, that Card Transaction will immediately reduce the total amount that can be drawn within the relevant Scheme Limit even though the amount of the Card Transaction may not yet have been debited to the Business Account.
- 2.10 If we are authorised in advance to make a future Card Transaction and the amount of the transaction is not known, we may reserve funds in the ePayables Business Account if you, the User or the Cardholder consent to an exact amount of funds to be reserved. Reserved funds will be released when we are made aware of the amount of the Card Transaction.
- 2.11 Amounts received after the applicable cut-off times specified in the schedule of cut-off times, which can be found at www.lloydsbank.com/commercialbanking, will be deemed to have been received on the following Business Day. Instructions received on days which are not Business Days for us will also be deemed to have been received on the next Business Day.
- 2.12 Once a Supplier Card has been used to initiate a payment, the Card Transaction cannot be stopped.
- 2.13 A Supplier may contact the Bank or an agent acting for the Bank for authorisation in respect of a Card Transaction that a Cardholder wants to make. Therefore there may be a delay before the Supplier processes a Card Transaction, and the Cardholder might not always be able to make a Card Transaction straight away, or at all.

You must be using Online Servicing Capabilities to do this. We will treat any instruction from a TPP as if it were from you.
- 4.2 We may refuse to allow a TPP to access your account information if we are concerned about fraudulent or unauthorised access by that TPP. Before we do this, we will tell you and explain our reasons for doing so, unless it is not reasonably practicable, in which case we will tell you immediately afterwards. In either case, we will tell you in the way which we consider most appropriate in the circumstances. We won't tell you where doing so will undermine our reasonable security measures or otherwise be unlawful.
- 4.3 We may make available to a TPP a specific means of accessing your account. If we do, and it tries to access your account by a different way, we may refuse to allow that access.
- 4.4 If you use a third party card issuer they may be able to request confirmation from us that you have the necessary credit available on your Business Account for them to approve a Card Transaction. We will only respond to a request if you have given us explicit consent to do so.

- 6.4 We recommend that the Customer checks the Business Account Statement and each Supplier Card Statement promptly on receipt. If there is an entry which seems to be wrong the Customer should tell us as soon as possible in accordance with clause 12.2 so that we can investigate. Delay in notification may make correcting the error difficult. If we need to investigate a transaction on any account the Customer agrees to co-operate with us and the police, if we need to involve them.
- 6.5 Subject to clause 12, the Customer is solely responsible to the Bank for all Card Transactions incurred on any Supplier Card. In addition to its other payment obligations, the Customer must repay to the Bank, on demand, the amount of any excess over the Scheme Limit, any arrears and any Card Transactions made in breach of the Agreement.

SCHEDULE 1

THE SERVICES

Summary

The Bank's ePayables product is a solution which can increase the efficiency and security of managing and paying supplier invoices using an enrolled Visa branded payment product. The solution allows Customers to be provided with an electronic invoice from a Nominated Supplier which can be paid directly through ePayables.

ePayables complies with existing card authorisation message types and data element specifications. Card Transactions must be authorised online by the authorisation system on the Visa Network for processing by the ePayables solution.

All ePayables applications consist of the integration and configuration specific options chosen by the Customer that incorporates select components of ePayables functionality.

Authorisation Controls

If selected as part of the Services, the Programme Administrator (with support from the Bank, as reasonably required) can set authorisation controls for each Nominated Supplier Invoice approved by a Cardholder or User including

- (a) payment amount
- (b) payment expiration period, and
- (c) specify relevant Nominated Supplier(s) where the Supplier Card can be used.

Application Interface Options

There are two types of web interfaces, each with specific functionality, available to the Customer which shall be selected by the Customer prior to implementation of the Services:

- Web portal
- Fully integrated (SSH File Transfer Protocol)

Web portal

A web-based application that allows Users to login, upload and/or approve Nominated Supplier Invoices. An approval flow can be configured, so that different Users upload and approve the Nominated Supplier Invoices. Once the invoice has been approved a web service call is sent from ePayables to the Bank card processing platform which dynamically increases the Supplier Card credit line for a period of time specified by the Customer. An email is also generated to the Nominated Supplier informing them that the Customer has authorised the Nominated Supplier to initiate the payment, the Supplier Card has been funded to the required amount and the Nominated Supplier can use the card to take payment within the expiration period specified by the Customer.

If selected as part of the Services, the Customer may (with support from the Bank, as reasonably required) create a Nominated Supplier Invoice approval process which

- (i) allows Users to upload a Nominated Supplier Invoice by accessing the Online Servicing Capabilities; and
- (ii) provides for each invoice to be sent for review and approval by the Customer using a workflow management process.

Fully integrated (SSH File Transfer Protocol)

Leveraging real-time file feeds a Customer sends a SFTP message to ePayables, containing approved Nominated Supplier Invoices. ePayables quickly responds through a web service call to the Bank card processing platform which dynamically increases the Supplier Card credit line for a period of time specified by the Customer. An email is also generated to the Nominated Supplier informing them that the Customer has authorised the Nominated Supplier to initiate the payment, the Supplier Card has been funded to the required amount and the Nominated Supplier can use the card to take payment within the expiration period specified by the Customer terms and conditions continued Integration required with touch points at the Customer specified location(s) or at other approved third party providers to access data and services via the real time SFTP:

- The Customer may use SFTP to integrate ePayables services into their existing ERP system, such as, to perform real time requests to fund Supplier Cards and facilitate payments.
- Other approved third party entities may use the SFTP to integrate the ePayables services into an external system, such as, your e-procurement or in-house purchasing system, to perform real-time requests for requests to fund Supplier Cards and facilitate payments

ePayables features

The ePayables solution provides the Customer with the following key product features:

- Generation of unique virtual Supplier Cards, no plastic is produced.
- Enhanced Customer pre-approval authorisation controls whereby spending can be controlled in various ways including purchase amount, payment expiration period and supplier.
- User-configurable workflow model to support the review and approval of Nominated Supplier Invoices via the hosted website (for Web Portal integrations only).
- Integration via real-time SFTP with Customer entities, e-procurement or in-house purchasing system, to perform real-time web service calls to dynamically fund Supplier Cards (for SFTP integrations only).
- Support of remittance emails to Nominated Suppliers.
- Undertake Supplier Card and programme management/administration self-service functions.

Customer Installation and Configuration

The Bank will support the following activities in ePayables during initial implementation:

- Enrol the Customer in ePayables.
- Set up the Programme Administrator for the Customer.
- Register Supplier Card numbers.

Once enrolled the Bank or Programme Administrator can access the web portal to set up and manage programmes for internal Users. The following activities can be performed by the Bank or Programme Administrator via the ePayables web portal:

- Establish the work flow approval process for Nominate Supplier Invoices.
- Create Users and assign permissions.
- Configure Nominated Suppliers to allow Users approving invoices to facilitate payments.
- Reset passwords.
- Review User and transaction activity.

Customer Support for ePayables

Following an investigation by a User using the web portal, should the Customer require ePayables support, this will be provided by the Lloyds Bank Corporate Card Services team.

This is the Customer's first point of contact to report problems with the application for the ePayables solution or to direct questions on the use of ePayables such as:

- Cannot upload or approve Nominated Supplier Invoice.
- Supplier Card not being dynamically funded correctly.
- Supplier Card transactions denied/declined.

The Lloyds Bank Corporate Card Services team will co-ordinate with other teams as appropriate to resolve the issue according to the Bank's internal escalation procedures.
